

METHVEN

EXPERIENCE
WATER

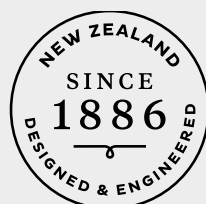

Creating amazing water experiences since

1886

Creating amazing water experiences is what we do every day at Methven, and have done since 1886 when George Methven first started as a producer of brass and iron hardware in Dunedin, New Zealand.

Today, Methven is world renowned for beautifully designed, award-winning showers, taps and valves. It all stems from our knowledge of water. Our unique history as an island nation has taught us to take care of nature's most precious resource.

Over the years we have learned how to harness its power to cleanse, calm, refresh and invigorate. It's this expertise - combined with our passion for design and innovation - that fuels our ongoing mission to create amazing water experiences, just for you.

Product Manual

Icons Menu

To help you to identify important product features, we have placed icons beside each product. When you're browsing through the brochure, simply come back to this page and refer to each icon meaning.

ALL PRESSURE DESIGN

Suitable for all water pressure installations (mains, unequal and equal low) above 35kPa.

VARIABLE SPRAY

Variable spray at your control. From a firm invigorating spray to relaxing and everything in between.

MAINS PRESSURE DESIGN

Suitable for mains water pressure installations above 150kPa.

HANDBSET FUNCTION

Identifies the number of spray functions from the shower handset or shower head.

EASY DIY INSTALLATION

Install the product on your own – no need for a plumber.

FLEXIBLE RAIL INSTALLATION

Adjustable mounting brackets for easy retrofit to existing installation holes.

SWIVEL SPOUT

Smooth, elegant and simple to use, our swivel spouts give you 360° control of your water flow.

CONTROL WATER DIRECTION

The directional aerator includes a built-in swivel that enables you to manually adjust the direction of your water and minimise splashback. (Perfect for taps that sit directly over the sinkhole).

TELESCOPIC RAIL

Telescopic rail slides out to extend rail height for greater flexibility. Perfect for tall users.

DUAL HANDBSET POSITION

Interchangeable handset position allows handset to be placed in optional overhead position for rain like experience.

DZR BRASS

Dezincification Resistant (DZR) brass bodies last longer and help maintain water quality.

IMPORTANT: KNOW YOUR WATER PRESSURE.

Before installing your showers and tapware it is important to know what water pressure your home has.

New building regulations require mains pressure to be limited to 500kPa maximum static pressure at any outlet within a building – Australian Standard AS/NZ 3500.1-2003, clause 3.3.4.

All Methven products are designed in accordance with this regulation. Households which do not meet the requirements defined by AS/NZS 3500.1-2003 can damage the product and void warranty.

While most Methven products are designed to operate on mains pressure installations, select products are able to operate at low or all pressures.

1. HOW DO I CHECK MY WATER PRESSURE?

- **Pressure Limited Valve**
To meet the requirements as per AS/NZ 3500.1-2003 buildings should have a Pressure Limiting Valve (PLV) installed. These valves are usually accessible and installed near the water meter or water supply to the building.
- **Contact Your Plumber**
If you are unsure if your water supply is properly limited. It's always safest to contact your plumber to check.

2. LOOK FOR THE ICON THAT CORRESPONDS TO YOUR PRESSURE:

The operating pressure on each product is clearly labelled using the following icons:

MAINS PRESSURE.

Operates on mains pressure installations between 150kPa – 500kPa.

ALL PRESSURE.

Operates on all pressure installations between 35kPa – 500kPa.

Guaranteed quality

We're proud to stand by each and every one of our products with a warranty.

The reason for this is simple: we manage the design and engineering of our products, so that we have control over the process from start to finish. We constantly push for perfection. In fact there is not a single component that hasn't been considered and refined for quality and durability.

Your shower experiences

Your shower should be a highlight of your day, transforming body and mind. But everyone has their own idea of the perfect shower. That's why at Methven we've spent a huge amount of time researching people's preferences, and creating innovations that turn your shower time into an amazing experience, every time.

VJet®

Introducing the award-winning Methven VJet® Tūroa Shower.

Because your showering needs are always changing, we set out to create an experience that's in your control.

Cleverly hidden channels create spirals of water, precisely released through individual nozzles. A smooth slider allows for seamless transition from a firm, invigorating spray to a gentle, enveloping warmth and everything in between.

Whether you're in need of revitalisation, relaxation or simply getting clean, VJet® is a shower without limitations, uniquely tailored by you.

All this adds up to a unique experience that transforms your day, every time you shower.

VJet®. My shower. My way.

Aurajet®

Aurajet®, our uniquely advanced design and invigorating shower turns conventional showering on its head.

Hidden nozzles generate individual jets of water that collide against precisely angled surfaces hidden within the contours of the unique halo-shaped showerhead.

The result is a highly efficient shower with 20% more spray force and twice the amount of water contact on your skin than a conventional shower*. All this adds up to an enveloping warmth that has to be felt to be believed, and a heavenly experience that puts you in a great space, every time you shower.

* Compared to a Methven Conventional Shower at 9L per minute.

Satinjet®

Turn an everyday ritual into a shower experience with award-winning Satinjet® technology from Methven.

Unlike conventional showers, Satinjet® uses unique twin-jet technology to create optimum water droplet size and pressure, with over 300,000 droplets per second. The result is an immersive, full-body shower sensation. And because we know everyone has their own idea of the perfect shower, Methven has crafted a range of Satinjet® showers you can match to your individual needs – from gentle and enveloping to powerful and invigorating. Satinjet® from Methven – prepare yourself for a truly sensational shower experience.

Airstream™

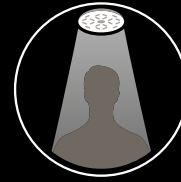

Welcome to Airstream™ from Methven. A refreshing combination of air and water that delivers a gentle, rain-like feel to your showering.

Fully integrated into the base of the handset, Airstream™ technology allows air to be drawn in and mixed with water at high pressure. Each air infused droplet then emerges from the showerhead as a larger, softer, rain-like drop.

The result is a more refreshing all-over shower experience.

Airstream™ from Methven – a simple and smart choice for any bathroom shower experience.

Striking visual aesthetics gives this range a fresh look, incorporating flair with reliability and design with functionality.

WIDE COVERAGE

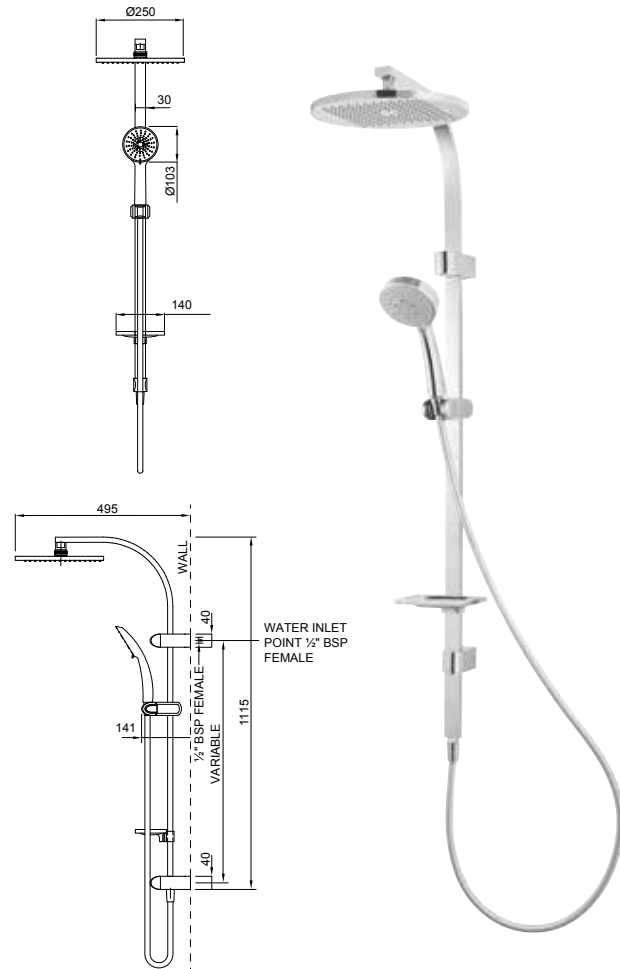

A wider, well-balanced spray for superior body coverage.

Guaranteed quality

We're proud to stand by each and every one of our products with a warranty.

The reason for this is simple: we manage the design and engineering of our products, so that we have control over the process from start to finish. We constantly push for perfection. In fact there is not a single component that hasn't been considered and refined for quality and durability.

We're proud to stand by each and every one of our products with a warranty. The reason for this is simple: we manage the design and engineering of our products, so that we have control over the process from start to finish. We constantly push for perfection. In fact there is not a single component that hasn't been considered and refined for quality and durability.

We're proud to stand by each and every one of our products with a warranty. The reason for this is simple: we manage the design and engineering of our products, so that we have control over the process from start to finish. We constantly push for perfection. In fact there is not a single component that hasn't been considered and refined for quality and durability.
